

Site visit: Robert Coppes Stichting

With some 150 employees the Robert Coppes Stichting (RCS) is a foundation that supports about 270 persons with a visual impairment and multiple additional disabilities (mainly psychiatric impairments and e.g. brain injury, hearing impairment, autism, addiction), age group 18+, including elderly.

Sometimes...

...being visually impaired is not the only problem

The RCS is one of the three service providers for visually impaired people in the Netherlands and the only one specialised in the mentioned target group. The RCS is mainly active in the South of the country. The main office is situated in Vught where we hope to welcome you. In that city RCS has 7 residential facilities and 3 day care facilities. In addition there are 4 offices for outpatient counselling in Sittard, Nijmegen, Breda and Vught.

<http://www.robertcoppes.nl>

Vught is located very close to the city of 's-Hertogenbosch (Den Bosch), the capital of the province Noord-Brabant, well known as an attractive tourist city, with its St. Johns Cathedral and being the birth place of the famous painter Jheronimus Bosch.
